NH ROUTE 25 PAVEMENT REHABILITATION IN OSSIPEE-EFFINGHAM
SIX MILES FROM NH 16B IN OSSIPEE TO SCHOOL STREET IN EFFINGHAM

The New Hampshire Department of Transportation announces work is scheduled to get underway this week on the rehabilitation of six miles of NH Route 25 in Ossipee and Effingham.

This project begins on NH 25 at the intersection with NH 16B in Ossipee and proceeds east to School Street in Effingham. It also includes the replacing of the deck on the NH Route 25 Bridge over Pine River, and drainage and guardrail work. During the bridge work, one lane of alternating traffic will be controlled by temporary signals. Alternating traffic will also be necessary during paving work.

Pike Industries of Belmont, New Hampshire is the general contractor for the \$2.6 million project. The scheduled completion date is September 2005.
